

1 Onboard

► Discover

During discovery, we'll work to understand your business needs and vision for your website.

- What design elements, and pages do you need on your new website?
- How can we make your site as authentic as possible to your destination and offering?

► Design

We design the homepage to give you a concept of the website utilizing your brand elements and insights from our discovery meeting.

► Plan

Once the design is approved, your Project Manager will need to gather assets to get your project moved into Development. You must provide these assets so we can stay on track with the timeline.

2 Develop

Phase 1 - Initial Development

► Migration & Implementation

We will configure the development server environment, migrate existing content from your existing website, and implement your new design.

► API Integration

Utilizing our API integration, we will connect your property management software to the development site and pull in your data.

► Review & Feedback

The development site link is shared with your team and your feedback is encouraged. The link will be available throughout the entire project.

Phase 2 - First Review Meeting

► Filling in the Gaps

Meet with your Project Manager and Project Developer to give us feedback and ask any questions you may have about the project. We will come to the meeting prepared to discuss the following:

- Image and text assets that are still needed to fulfill requests
- Any data issues or updates that need to be addressed for your website to work efficiently
- Please come prepared to the next meeting with any updates you would like to see. Any changes requested after the next meeting will need to be implemented after the launch.

► Schedule Pre-Launch Meeting

Phase 3 - Pre Launch Meeting

► Reservation Testing

Leading up to this meeting, we will submit a test reservation to review the API functionality & make sure reservations are coming in as expected.

► Final Pre-Launch Adjustments

Bring any edits or requests needing to be completed before your website launches to this meeting.

► Schedule Launch

3 Launch

► Time to Go Live

After you have approved & scheduled a launch date, your development website goes through an extensive internal review to ensure once more we have fulfilled all project requirements and delivered a product that meets our standard for design and industry best practices.

- Provided full listing API functionality
- Tested on all major browsers and devices
- Migrated all expected content & reviews

4 Support

► Reliable Support

After launch, utilize our support for any content updates, issue resolution, or other requests you may have. We'll respond to let you know we are working on it.

- Email: support@realtechvr.com
- Phone: 941.870.5707

► Post Launch Meeting

Our team will reach out shortly after launch to check on your experience and make sure you understand how to use the tools on your website.
